DORÉ COPPER MINING

Management's Discussion and Analysis

For the three and nine months ended September 30, 2022

(Stated in Canadian Dollars)

DORÉ COPPER MINING

MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
For the nine months ended September 30, 2022 and 2021

Date of Report: November 17, 2022

General

The following Management's Discussion and Analysis ("MD&A") of Doré Copper Mining Corp. ("Doré" or the "Corporation") should be read in conjunction with the unaudited condensed consolidated interim financial statements for the three and nine months ended September 30, 2022 and the notes thereto. The Corporation's unaudited condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"). Unless otherwise stated, all amounts discussed herein are denominated in Canadian dollars. This MD&A was prepared as of November 17, 2022*, and all information is current as of such date. Readers are encouraged to read the Corporation's public information filings on SEDAR at www.sedar.com.*

This discussion provides management's analysis of Doré's historical financial and operating results and provides estimates of Doré's future financial and operating performance based on information currently available. Actual results will vary from estimates and the variances may be significant. Readers should be aware that historical results are not necessarily indicative of future performance.

Corporate Overview

Doré Copper Mining Corp., (formerly AmAuCu Mining Corporation ("AmAuCu")), was incorporated under the laws of Canada on April 11, 2017, and through its 100% owned subsidiary, CBay Minerals Inc. ("CBay") owns an interest in mineral properties located in Chibougamau, Quebec, for the purposes of exploration and evaluation. The Corporation's office is located at 130 King St. W., Suite 1800, Toronto, Ontario.

On December 13, 2019, the Corporation completed a reverse takeover transaction (the "Transaction" or "Qualifying Transaction"), pursuant to which AmAuCu amalgamated with a wholly owned subsidiary of ChaiNode Opportunities Corporation ("ChaiNode"), and was subsequently renamed Doré Copper Mining Corporation (see note 10). The Corporations common shares were subsequently listed on the Toronto Stock Venture Exchange ("TSX-V") and began trading under the symbol "DCMC" on December 17, 2019.

The Corporation's main assets, held through its 100% owned subsidiary, CBay, include the Corner Bay deposit, the Cedar Bay past producing mine, the Copper Rand past producing mine, the Devlin deposit, the Copper Rand mill and tailings management facility. Other deposits include the Doré Ramp deposit, and various exploration targets on Portage Island. In addition, the Corporation has an option to acquire a 100% interest in the former Joe Mann mine, which produced 1.12 million ounces of gold from at an average grade of 8.26 g/t from the 1950s to 2007.

The last operating mine within the Corporation's assets was the Copper Rand mine which ceased operations in December 2008 when the assets were owned by Campbell Resources.. After mining stopped, the Copper Rand mill was put in a shutdown protocol in late 2008 and in early 2009 flotation cells, pump boxes, thickeners and slurry lines were all emptied. The ball mills were emptied of material, liners were removed and the mills were raised on jacks. Afterwards the equipment was deenergized.

Operational Highlights Q3 2022

The Corporation is engaged in the acquisition, exploration, evaluation and development of mineral properties.

Exploration

During Q3 2022, a total of 5,974 meters were drilled on the Corner Bay property. One drill rig was in operation during the quarter. The Company is currently drilling the Doré Ramp deposit with a series of wedge holes from its discovery hole (LDR-22-01) which intersected two veins with one grading 4.37% Cu, 0.87 g/t Au and 13.0 g/t Ag over 2.4 meters, including 17.6% Cu, 1.76 g/t Au and 43.90 g/t Ag over 0.5 meter, at a vertical depth of 880 meters.

Corner Bay

The drilling completed at Corner Bay was mostly infill drilling at a 50 to 60 meter spacing from surface to a depth of 1,000 meters with the objective of converting inferred resources to the indicated category with a few holes adjacent to the existing mineral resource envelope. Year to date, the Company has completed 38,405 meters at Corner Bay with the majority being infill drilling.

The Company announced the first set of assay results from its 2022 drilling program on July 11, 2022 and the second set of results on August 11, 2022. Highlights included:

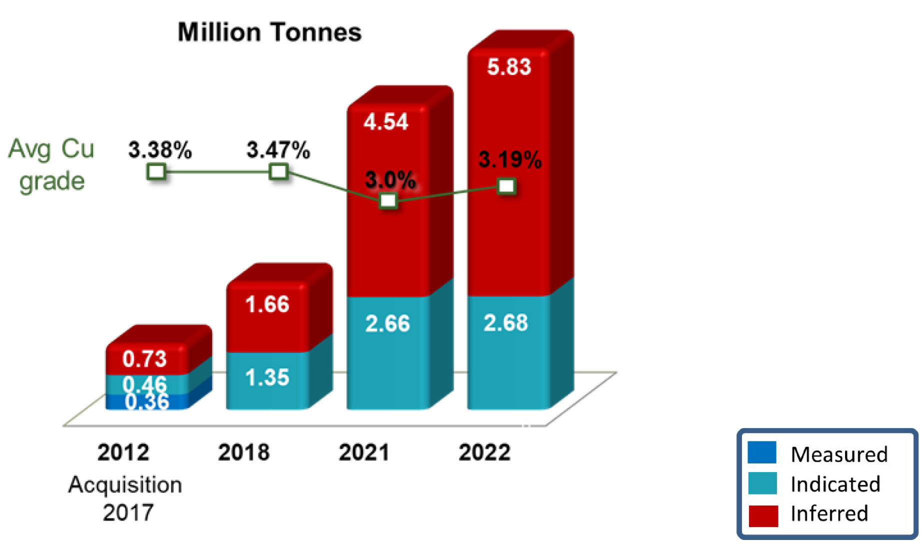
Main Vein above dyke

- CB-22-77: 2.6 meters of 2.33% Cu, and 10.7 g/t Ag
- CB-22-84: 3.0 meters of 3.39% Cu, 25.2 g/t Ag, and 419 ppm Mo
- CB-22-89: 4.6 meters of 2.54% Cu, 20.3 g/t Ag, and 346 ppm Mo

Main Vein below dyke

- CB-22-63: 2.5 meters of 5.07% Cu, 0.17 g/t Au, 14.3 g/t Ag and 889 ppm Mo
- CB-22-64: 13.3 meters of 3.47% Cu, 0.13 g/t Au and 20.0 g/t Ag, including 1.8 meters of 11.07% Cu, 0.17 g/t Au, 57.3 g/t Ag and 3.1 meters of 5.15% Cu, 0.24 g/t Au and 29.6 g/t Ag
- CB-22-68: 10.9 meters of 4.24% Cu, 0.62 g/t Au, 15.2 g/t Ag, and 1,226 ppm Mo, including 4.0 meters of 7.36 % Cu, 0.45 g/t Au and 23.4 g/t Ag
- CB-22-69: 3.4 meters of 2.54% Cu, 0.24 g/t Au, 8.6 g/t Ag, and 1,038 ppm Mo
- CB-22-71: 6.7 meters of 5.41% Cu, 0.45 g/t Au, and 29.7 g/t Ag, including 1.6 meters of 12.14% Cu, 0.10 g/t Au, and 67.6 g/t Ag
- CB-22-76: 5.4 meters of 3.37% Cu, 1.0 g/t Au, 23.7 g/t Ag and 1,597 ppm Mo
- CB-22-78: 4.7 meters of 2.3 % Cu, 0.14 g/t Au and 7.7 g/t Ag

The mineral resources growth at Corner Bay since Doré Copper acquired the property in 2017 is shown below.



Note: Average copper grade reported on the graph above is for all resource categories.

The Corner Bay deposit is hosted by the intrusive Lac Doré Complex on the southern flank of the Chibougamau anticline. A regional north-northeastern diorite dyke also cuts the area. Several significant shear zones oriented north-south and northwest-southeast have been identified in the area. The Corner Bay area is characterized by copper porphyry style mineralization and by copper mineralization in shear zones commonly associated with dykes related to the Chibougamau Pluton.

The Main Vein is oriented N10ºW orientation dipping 75 to 85 degrees towards the west. To the north, the Main Vein is limited by one of the NW-SE structures while to the south it is open at depth across the “La Chib” fault. The mineralization varies from 15 centimeters to 8 meters thick, located within a shear zone varying in width from 2 to 25 meters. The proposed mining zones have an average thickness of 3.48 meters. The Main Vein below the dyke to the south is thicker than the Main Vein above the dyke. The Main Vein lateral extension is approximately 1 kilometer and it remains open at depth down-dip.

Doré Ramp

The Doré Ramp is located approximately 2.5 kilometers by road southwest of the Copper Rand mine and mill. The deposit was drilled in a few different phases from 1984 to 1992. A total of 47 drill holes from surface are reported during that period. A double ramp of approximately 1 kilometer was excavated in 1991-92 to a vertical depth of 160 meters, followed by an underground drilling campaign of 46 holes totaling 10,200 meters testing the deposit mainly to a depth of 240 meters (only five holes tested the deposit between 300 and 600 meters). At the end of 1992, Westminer Canada reported a historical estimate of 209,120 tonnes at 1.23% Cu and 5.4 g/t Au, from a depth of 115 meters (surface pillar limit) to 350 meters (Source: Westminer Canada Limited, Project Lac Doré, November 1992). *This estimate is considered to be historical in nature and should not be relied upon. A Qualified Person has not completed sufficient work to classify the historical estimate as a current mineral resource or mineral reserve. The Company is not treating the historical estimate as current mineral resources or mineral reserves.* No subsequent exploration programs were carried out on the Doré Ramp deposit.

As with the Copper Rand mine, the deposit is located on the south side of the Lac Doré fault and it remains open at depths below 400 meters and along strike towards the Lac Doré fault.

During Q2 2022, the Company completed hole LDR-22-01 totaling 1,334 meters. This hole targeted an area 875 meters below surface and approximately 350 meters down plunge from the deepest historical drilling. The hole intercepted two veins with one grading 4.37% Cu, 0.87 g/t Au and 13.0 g/t Ag over 2.4 meters, including 17.6% Cu, 1.76 g/t Au and 43.90 g/t Ag over 0.5 meter. The mineralized zone was immediate adjacent to a mafic dyke as was observed in the upper part of the deposit and also at the Copper Rand mine. The Company is currently compiling historical information with the goal of developing a geological model to guide a more effective drilling program in the future.

In Q4 2022, the Company started a series of wedge holes from LDR-22-01 to test within 50-100 meters away from the mineralization intersected in LDR-22-01.

PEA Project

During the third quarter, a 400 kg sample comprised of drill core representative of the Corner Bay deposit was sent to a sorting equipment supplier. The sorting tests will be completed in Q4.

The results of the Preliminary Economic Assessment (“PEA”) was announced on May 10, 2022 with the Technical Report filed on SEDAR on June 15, 2022. A copy of the PEA can be obtained from SEDAR and is available on the Company’s website. The PEA supports a hub-and-spoke operation with the high-grade Corner Bay copper-gold deposit as its main underground mine along with the Devlin copper deposit and the former Joe Mann gold mine providing feed to its Copper Rand mill (collectively, the ”Project”). The PEA demonstrates attractive project economics with optionality for expansion into a significantly larger operation, re-establishing the Chibougamau mining camp as a long-life copper and gold producer.

The PEA envisions a hub-and-spoke model operation starting first with the underground development of the Devlin and Corner Bay (main deposit) deposits via existing ramps. Once the Devlin deposit is mined out after approximately 4 years, production at the Joe Mann mine would start and be funded out of cash flow from operations. Joe Mann benefits from an existing headframe and shaft, including all surface infrastructures.

A fixed crushing circuit and ore sorter plant (XRT) would be installed at Corner Bay and would reject the low-grade and dilution material from the Devlin and Corner Bay mines. The high-grade material would be transported by trucks to the refurbished and optimized Copper Rand mill. The filtered tailings would be transported to a dry stack tailings facility, which uses part of the footprint at the existing tailings facility.

The copper a concentrate produced would be transported to the port of Québec City for onward shipping to international smelters, or to a local smelter. Ocean Partners Ltd. has the off-take agreement with treatment and refining charges terms are within standard market rates.

Table 1: PEA Summary of Key Metrics

Description	Unit	Base Case[1] 24-month Trailing Avg	Spot Prices May 9, 2022
Metal Prices/FX			
Copper (Cu)	US$/lb	**3.75**	4.20
Gold (Au)	US$/oz	**1,820**	1,854
Currency Exchange Rate	USD/CAD	**1.28**	1.30

Resource Tonnes	T	**9,150,710**	9,150,710
Copper Equiv. Grade	%	**2.98**	2.98
Daily Mill Throughput	Tpd	**1,350**	1,350
Annual Processing Rate	Ktpa	**490**	490
Mine Life	Years	**10.5**	10.5
Avg Annual Production (in concentrate)	Mlbs CuEq	**53**	53
Operating Costs (LOM avg)			
Total Operating Costs[2]	C$/t mined	**106**	106
	C$/t milled	**186**	186
All-in Sustaining Costs[3,4]	US$/lb CuEq	**2.24**	2.24
Capital Costs[5]			
Initial Capital	C$M	**180.6**	180.6
LOM Sustaining Capex	C$M	**402.4**	402.4
Financial Analysis (unlevered)			
Pre-Tax NPV 8%	C$M	**367**	555
Pre-Tax IRR	%	**30.7**	40.1
After-Tax NPV 8%	C$M	**193**	303
After-Tax IRR	%	**22.1**	29.4
Payback Period (Production Start)	years	**5.5**	4.2

1. Base case metal prices based on 24-month trailing average from March 31, 2022.
2. Total operating costs include mining, processing, tailings, surface infrastructures, transport, and G&A costs. See Table 3.
3. AISC includes cash operating costs, sustaining capital expenses to support the on-going operations, concentrate transport and treatment charges, royalties and closure and rehabilitation costs divided by copper equivalent pounds produced. See Table 3.
4. AISC is a non-IFRS financial performance measures with no standardized definition under IFRS (refer to non-IFRS financial measures discussed below). .
5. See Table 2.

Capital Cost

The PEA for the Project outlines an initial (pre-production) capital cost estimate of $180.6 million and sustaining capital costs over the life of mine ("LOM") of $402.4 million, which includes the capital to restart Joe Mann and overall closure costs of $53.6 million. Initial underground capital costs include the rehabilitation of the portals at Corner Bay and Devlin, facilities for water capture and treatment at both locations, construction of a 16 km, 34 kV powerline to Corner Bay, and 3.25 km to Devlin), a crushing circuit and ore sorter at Corner Bay, improvements to existing roads and 4 km of new roads connecting Corner Bay and Devlin, a new feed material reception and mill feed conveyor, ball milling and gravity circuit, rehabilitated flotation and concentrate filtration circuit and new tailings filtration circuit at the mill, and preparation of an area on the existing TMF for the placement of filtered tailings and a water treatment facility.

DORÉ COPPER MINING

Table 2: Capex Estimates

Cost Element	Initial Capital (C$M)[1]	Sustaining Capital (C$M)[1,3]
Mine Costs		
Corner Bay	14.8	247.3
Devlin	7.0	0.4
Joe Mann[2]	0.0	51.9
Processing (including Ore Sorting)	54.2	1.1
Infrastructure	34.5	15.5
Tailings	13.8	16.7
EPCM and Indirect Costs[4]	22.8	5.5
Owner's Costs[4]	9.9	3.1
Subtotal Capex	**$157.1**	**$341.6**
Contingency[5]	23.6	7.2
Reclamation and Closure	0.0	53.6
Total Capex	**$180.6**	**$402.4**

1. All values stated are undiscounted. No inflation or depreciation of costs were applied.
2. Contingency, owner's costs, EPCM and indirect costs on Joe Mann's initial capital also included in the sustaining capital.
3. Sustaining capital does not include salvage values, estimated at $17 M for all sites.
4. Includes owner's costs of 8%, construction indirects of 10%, and EPCM of 12% for mill and tailings and 4% for mining of direct costs.
5. Includes contingency of 15% for all initial capital, owner's costs, construction indirects, and EPCM.

Operating Costs

Operating costs estimates were developed using first principles methodology, vendor quotes received from Q4 2021 to Q1 2022, and productivities being derived from benchmarking and industry best practices. Over the LOM, the average operating cost for the Project is estimated at $106/t mined and $186/t milled.

The average cash operating costs over the LOM is US$1.35/lb CuEq and the average AISC is US$2.24 /lb CuEq.

Table 3: Operating Cost Summary

	Average LOM
Mining	C$61/t mined / C$108/t milled
Processing (including Ore Sorting)	C$32/t milled
Tailings[1]	C$7/t milled
Infrastructure and Transport	C$28/t milled
G&A	C$12/t milled
Total operating costs	**C$186/t milled**
Cash operating costs [2,4,5]	**US$1.35 /lb CuEq**
All-in sustaining costs [3,4,5]	**US$2.24 /lb CuEq**

1. Tailings filtration costs are in processing costs.
2. Cash operating cost includes mining, processing, tailings, surface infrastructures, transport, and G&A to the point of production of the concentrate at the Copper Rand site divided by copper equivalent pounds produced. It excludes off-site concentrate costs, sustaining capital expenses, closure/rehabilitation and royalties. CuEq calculation assumes metal base case prices.
3. AISC includes cash operating costs, sustaining capital expenses to support the on-going operations, concentrate transport and treatment charges, royalties and closure and rehabilitation costs divided copper equivalent pounds produced.
4. Copper equivalent (CuEq) costs uses only payable gold in concentrate and is applied as a credit against costs.
5. Cash operating cost and AISC are non-IFRS financial performance measures with no standardized definition under IFRS (refer to non-IFRS financial measures discussed below).
6. Numbers may not add up due to rounding.

Economic Analysis and Sensitivities

The PEA indicates that the potential economic returns from the Project justify its further evaluation by advancing to a feasibility study.

Table 4: Summary of Economic Analysis[1,2]

		Base Case
Metal Price Assumptions (US$)		$3.75/lb Cu, $1,820/oz Au
Exchange Rate (USD/CAD)		1.28
	Pre-tax	**After-tax**
NPV (8% discount)	C$366 M	C$193 M
IRR	30.7%	22.1%
Payback Period	4.2 yrs	5.5 yrs
EBITDA	C$1,313 M	C$1,313 M
LOM Undiscounted Net Cash Flow	C$747 M	C$455 M

1. The analysis assumes that the Project is 100% equity financed (unlevered).
2. Appropriate deductions are applied to the concentrate produced, including treatment, refining, transport and insurance costs.

The Project generates cumulative cash flow of $455 million on an after-tax basis and $747 million pre-tax at a base case of US$3.75/lb Cu based on an average mill throughput of 1,350 tpd over 10.5 years. The 2% net smelter return ("NSR") royalty over the Joe Mann mine, and the 15% net operating profits interest (NPI) royalty and the 2% NSR on the gross value of the mineral products exceeding US$60 million over Devlin have been applied to the cash flow model for a total of $13.3 million undiscounted.

The PEA economic analysis is significantly influenced by copper prices. At spot metal prices of US$4.20/lb Cu and US$1,854/oz Au, the Project generates an after-tax Net Present Value ("NPV") using an 8% discount rate of $303 million and an after-tax IRR of 29.4% with a payback period of 4.2 years from the commencement of production. Outlined below in Table 5 is a detailed sensitivity analysis across various commodity prices.

Table 5: Sensitivity Analysis

		Base Case		Spot
Copper Prices (US$/lb)	3.40	**3.75**	4.10	4.20
Gold Prices (US$/oz)	1,650	**1,820**	1,820	1,854
Pre-tax NPV (8% discount) (C$M)	228	**367**	494	555
After-tax NPV (8% discount) (C$M)	107	**193**	269	303
Pre-tax IRR (%)	23.2	**30.7**	37.2	40.1
After-tax IRR (%)	16.1	**22.1**	27.2	29.4

Opportunities

- Add Corner Bay's silver and molybdenum content (currently excluded for mineral resources)
- Potential to extend mine life by expanding mineral resources at both Corner Bay and Joe Mann once operation starts
- Surplus grinding capacity at the Copper Rand mill
- Underpins potential for low-cost organic production growth (other nearby assets, including Cedar Bay and Copper Rand) to be evaluated during LOM)
- Potential to increase Corner Bay and Devlin concentrate grades which would decrease treatment charges and shipping costs
- Potential labour cost savings by self-performance for various mill rehabilitation activities
- Potential to install a 25 kV line from the Québec grid to Corner Bay (PEA design has a 34 kV line)
- Potential for a carbon neutral operation with PEA design to utilize power from the Québec grid, minimizing trucked material with ore sorting technology and implementing trolley-assist hauling technology at the Corner Bay mine site. In the feasibility study, the Corporation will attempt to be carbon neutral by the end of Devlin's mine life (approximately 4 years).

Mineral Resources

The basis for the PEA uses an updated mineral resource estimate for the Corner Bay deposit (effective date March 30, 2022) and previously published MRE for Devlin and Joe Mann, respectively October and July 2021, restated with an updated effective date of March 30, 2022. Refer to the news release dated May 10, 2022 for more details.

The Corporation cautions that the results of the PEA are preliminary in nature and include Inferred mineral resources that are considered too speculative geologically to have economic considerations applied to them to be classified as mineral reserves. There is no certainty that the results of the PEA will be realized.

Technical Report

The Technical Report for the PEA titled "Preliminary Economic Assessment for the Chibougamau Hub-and-Spoke Complex, Québec, Canada" is dated June 15, 2022, in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101"). The Technical Report was prepared by BBA Inc. with several consulting firms contributing to sections of the study, including SLR Consulting (Canada) Ltd., SRK Consulting (Canada) Inc. and WSP Inc. The Qualified Persons are independent as defined by Canadian Securities Administrators NI 43-101. The Qualified Persons are not aware of any environmental, permitting, legal, title, taxation, socio-economic, marketing, political, or other relevant factors that could materially affect the PEA.

Readers are encouraged to read the Technical Report in its entirety, including all qualifications, assumptions and exclusions that relate to the details summarized in this news release. The Technical Report is intended to be read as a whole, and sections should not be read or relied upon out of context.

Non-IFRS Financial Measures

Doré Copper has included certain non-IFRS financial measures in the PEA (reported in the MD&A), such as initial capital cost, cash operating cost and AISC per pound of copper equivalent produced, unit operating costs, and EBITDA which are not measures recognized under IFRS and do not have a standardized meaning prescribed by IFRS. As a result, these measures may not be comparable to similar measures reported by other corporations. Each of these measures used are intended to provide additional information to the user and should not be considered in isolation or as a substitute for measures prepared in accordance with IFRS.

A description of the significant cost components that make-up the forward-looking non-IFRS financial measures cash operating cost and AISC per pound of copper equivalent produced is shown in the table below.

Total Sustaining Capital and Closure Costs	$402.4 M
Total Cash Operating Costs	$966.5 M
Historical All-in Sustaining Costs	$0.0 M
Commercial Costs	$223.9 M
NSR Royalties	$13.3 M
Total All-In Sustaining Costs for AISC Calculation	**$1,606.1 M**
Mill Recovered Copper Equivalent (Mlbs)	560.8
Exchange Rate USD/CAD	1.28
Cash Operating Costs	**US$1.35/lb CuEq**
All-in Sustaining Costs	**US$2.24/lb CuEq**

Site Activities

The Company completed a series of refurbishments and improvements to the Copper Rand mill. These included the installation of LED lights in the areas of the mill included in the PEA, structural roof refurbishments, partial roof replacement, sanding and painting of flotations cells, thickeners, filters, rehabilitation of workshops, painting of railings, removing unrequired equipment and reagents, and stripping of old electrical wiring not part of the PEA scope.

Environment

Sampling of the water flow from the tailings polishing pond is ongoing. The samples are analyzed at an accredited laboratory and uploaded to an environment Canada mine water quality site. All water quality results are far below exceedance levels and the pH is stable at levels similar to the natural water bodies in the region.

Health and Safety

There was one reportable accident during the quarter. A contractor was bitten by a dog at site belonging to an employee. The contractor had had previous friendly interaction with this dog.

A site inspection was done by regional health and safety inspectors with no major findings.

Community

The Company hosted government and city officials to the site on three different occasions highlighting the work done at the site and at the mill, as well as showing some examples of typical core from the Company's different deposits.

The Company presented the results of its PEA and provided a company update to the band council of Ouje Bougoumou Cree Nation.

COVID-19

Since December 31, 2019, the spread of COVID-19 has severely impacted many local economies around the globe. In many countries, including Canada, businesses are being forced to cease or limit operations for long or indefinite periods of time. Global stock markets have also experienced great volatility and a significant weakening. Governments and central banks have responded with monetary and fiscal interventions to stabilize economic conditions.

The Corporation has been monitoring the COVID-19 outbreak and the potential impact at all of its operations and has put measures in place to ensure the wellness of all of its employees and surrounding communities where the Corporation works while continuing to operate. Currently, fieldwork has resumed on all of our projects, while all corporate personnel travel has been restricted to absolute minimum requirements and employees have been encouraged to work remotely. With respect to our operations or work locations in Québec, we have implemented the typical control measures for dealing with the outbreak of COVID-19. These include self-screening for symptoms and travel history with possible COVID-19 exposure of any employees, visitors and contractors (site personnel) prior to any travel to or from a site and isolation, where necessary, from the general site population. These cautions and precautions rely on voluntary information and voluntary compliance of those working directly or indirectly for the Corporation. We expect that procedures will continue to evolve according to the World Health Organization and Center for Disease Control guidelines as more becomes known about the virus.

Results of Operations

The following table provides selected financial information and should be read in conjunction with the Corporation's audited financial statements for the periods below.

	Year ended December 31, 2021 $	Year ended December 31, 2020 $
Operations		
Other Income	**614,060**	1,100,248
Loss for the year	**(14,528,621)**	(10,199,736)
Loss and comprehensive loss for the year	**(13,914,561)**	(9,099,488)
Basic and diluted loss per share	**(0.24)**	(0.30)
Balance Sheet		
Working capital (deficit)	**14,079,768**	4,239,737
Total assets	**24,334,999**	11,589,759
Total liabilities	**(4,266,552)**	(1,409,043)

Summary of Quarterly Results

The following table sets out selected quarterly financial data for the most recently completed interim quarters:

Quarter	2022 Third	2022 Second	2022 First	2021 Fourth	2021 Third	2021 Second	2021 First	2020 Fourth
	($)	($)	($)	($)	($)	($)	($)	($)
Other income	77,843	54,911	33,650	58,052	72,583	28,902	26,367	8,673
Operating expenses	(8,874,831)	(6,422,371)	(6,914,663)	(2,045,732)	(4,860,954)	(3,992,264)	(3,699,471)	(2,105,412)

DORÉ COPPER MINING

Overall Performance

The loss for the three and nine months ended September 30, 2022 was $6,765,158 and $13,413,057 respectively, which was $2,209,982 lower for the three months ended September 30, 2021 and $1,597,148 lower for the nine months endedSeptember 30, 2021 when compared to the loss of $4,555,176 and $11,815,909 for the same periods of the previous year. The balance of the expenditure categories for the three and nine months ended September 30, 2022 have increased relative to the same periods of the previous year as the Corporation has had an increased exploration program relative to the same period of the previous year. Consulting increased from $205,238 to $449,545 and $575,055 to $533,618, exploration and evaluation increased from $4,223,283 to $7,166,835 and $10,375,867 to $13,466,914, insurance increased from $Nil to $Nil and $Nil to $Nil, investor relations increased from $113,971 to $306,419 and $432,818 to $478,183, professional fees increased from $51,823 to $423,840 and $245,186 to $483,744, and share-based payments increased from $193,861 to $328,113 and $550,425 to $511,310. Overall operating expenses increased from $4,860,954 to $8,874,831 and $12,552,691 to $15,789,497, which can be attributed to the increased exploration program undertaken in the current period.
Over the previous quarters since incorporation, the Corporation has seen the loss vary depending primarily on the amount of exploration expenditures, as well as financing available, while managing to keep a control on the administrative expenses, with slight variances due to activity levels. On a go forward basis the Corporation will continue to monitor expenditures closely as the Corporation continues its work on the current property portfolio, as well as exploring other potential opportunities as they arise.

The Corporation recorded $44,193 and $77,843 in income related to guaranteed investment certificates held for the three and nine months ended September 30, 2022, respectively, as well as $1,576,559 and $1,809,676 in other income related to the deferred flow-through share premium. At September 30, 2022 the Corporation had cash and cash equivalents of $1,038,177, as well as investments held in cashable guaranteed investment certificates of $840,419.

Exploration and evaluation expenditures

The Corporation incurred exploration and evaluation expenditures of $13,466,914 during the nine months ended September 30, 2022, the breakdown of exploration and evaluation for the period was as follows:

For the nine months ended

Acquisition costs	**Cedar Bay** $	**Corner Bay** $	**Other properties** $	**September 30, 2022** $	**December 31, 2021** $
CBay acquisition costs**	**2,075,500**	**3,592,529**	**262,600**	**5,930,629**	5,930,629

For the three months ended

Acquisition costs	**Cedar Bay** $	**Corner Bay** $	**Other properties** $	**September 30, 2022** $	**December 31, 2021** $
CBay acquisition costs**	**2,075,500**	**3,592,529**	**262,600**	**5,930,629**	5,930,629

** The acquisition costs have been allocated to the separate mineral properties based management's assessment of the economic valuations of the properties at the time of acquisition.

Mineral property acquisitions and agreements

Chibougamau, Quebec

Interest in Cedar Bay / Corner Bay and Other properties through acquisition of CBay

The main assets include the Corner Bay deposit, the Cedar Bay past producing mine, the Copper Rand past producing mine, the Devlin deposit, the Copper Rand mill and tailings management facility. Other deposits include the Doré

Ramp deposit, and various exploration targets on Portage Island.

Cornerback Property (included in "Other Properties")

On September 7, 2017 (the "Effective Date"), the Corporation entered into an Option Agreement (the "Agreement") with VanadiumCorp Resource Inc. ("Vanadium") to acquire up to a 100% interest in the Cornberback property (the "Property) located in Quebec.

Pursuant to the agreement, the Corporation can acquire an 80% undivided interest in the Property by (the "First Option"):

(a) making payments of an aggregate of $250,000 to Vanadium as follows:

i) $50,000 in cash on Effective Date (paid);
ii) an additional $50,000 in cash on or prior to the date that is the 12 months from the Effective Date (paid); and
iii) an additional $50,000 in cash on or prior to the date that is the 24 months from the Effective Date (paid); and
iv) an additional $50,000 in cash on or prior to the date that is the 36 months the Effective Date (paid); and

(b) incurring an aggregate of $500,000 in expenditures on the Property on or before the date that is 36 months from the Effective Date (completed).

The Corporation having exercised the First Option and acquired an 80% undivided interest in the Property, free and clear of any encumbrances, the Corporation had the additional exclusive right and option exercisable at any time prior to September 6, 2021, to acquire an additional 20% undivided interest in the Property by paying $50,000 in cash to Vanadium on or before September 6, 2021. The Corporation completed this payment on May 6, 2021 and now retains a 100% undivided interest in the property.

Option agreement to acquire Joe Mann property

On January 2, 2020, the Corporation entered into an option agreement to acquire a 100% interest in the Joe Mann gold mine (“Joe Mann“) located in Québec. The Corporation entered into an option agreement with the owners of Joe Mann, Ressources Jessie Inc. (“Ressources Jessie“) and Legault Metals Inc. (“Legault“), to acquire a 100% interest in Joe Mann on the following terms:

- A cash payment of $1,000,000 to Ressources Jessie and 400,000 common shares of Doré Copper (“Doré Copper Shares“) were issued to Legault at a deemed price of $1.25 per share on January 2, 2020 (the “Joe Mann Effective Date“) (paid).
- A cash payment of $250,000 to Ressources Jessie and $500,000 in Doré Copper Shares to be issued to Legault on the first anniversary of the Joe Mann Effective Date (paid).
- A cash payment of $1,000,000 to Ressources Jessie upon completion of 5,000 meters of drilling at Joe Mann or on the earlier of the second anniversary of the Joe Mann Effective Date or 18 months from the commencement of drilling (paid).
- A cash payment of $500,000 to Ressources Jessie and $500,000 in Doré Copper Shares to be issued to Legault on the second anniversary of the Joe Mann Effective Date (cash paid and shares issued).
- A cash payment of $1,500,000 to Ressources Jessie and $1,000,000 in Doré Copper Shares to be issued to Legault on the third anniversary of the Joe Mann Effective Date.
- Spending $2,500,000 in qualifying exploration expenditures before the third anniversary of the Joe Mann Effective Date.
- A cash payment of $1,000,000 to Ressources Jessie and $1,500,000 in Doré Copper Shares to be issued to Legault upon the commencement of commercial production at Joe Mann.
- A 2% net smelter return royalty will be granted to Ressources Jessie and the Corporation will hold the option to buy back 1% for $2,000,000 and buy back a further 0.5% for $4,000,000.

On November 1, 2022 the Company entered into an amending agreement (the "Amending Agreement") with Ressource Jessie Inc. (the "Optionor") in respect of the Joe Mann Property. Pursuant to the terms of the Amending Agreement, the Company has agreed to accelerate the final scheduled cash and share payments under the Option Agreement. The Company has made the final scheduled cash payment of $1,500,000 to Ressources Jessie (thus fulfilling the scheduled cash payment obligations), and will issue 3,333,333 common shares in the capital of the Company ("Common Shares") to Legault Metals Inc. ("Legault") at a deemed price of $0.30 per Common Share for an aggregate value of $1,000,000 upon acceptance of the TSX Venture Exchange (thus fulfilling all scheduled share payment obligations). The deadline for the Company to incur the remaining exploration expenditures on the Property has also been extended to February 28, 2023.

Following the fulfillment of the scheduled cash and share payment obligations, Ressources Jessie will commence the transfer of the Property to the Company. Upon exercise of the option, the Company is required to grant to Ressources Jessie a 2% net smelter return ("NSR") royalty on the mine production from the Property. The Company will entitled to buy back 1% NSR in consideration for a payment to Ressources Jessie of $2,000,000 and to buy back an additional 0.5% NSR in consideration for a payment to Ressources Jessie of $4,000,000.

Pursuant to the original terms of the Option Agreement, upon the commencement of commercial production at the Property, Doré Copper will make an additional $1,000,000 cash payment to Ressources Jessie and issue $1,500,000 in Common Shares to Legault.

Norbeau Property and Norbeau East Property Option Agreements

On March 13, 2021, the Corporation entered into option agreements (the "Option Agreements") to acquire a 100% interest in the former producing Norbeau gold mine property and the contiguous Beaurox property, located approximately 15 kilometres by road north from the Corporation's Copper Rand mill in the Chibougamau mining camp in northwestern Québec, Canada.

Under the terms of the Option Agreements, the Corporation may earn a 100% interest in the Properties under the following terms:

<u>Norbeau Property</u>

- $50,000 in cash payments and $175,000 equivalent in Shares following receipt of TSX Venture Exchange approval (paid), $50,000 in cash payments and $75,000 equivalent in Shares on the first anniversary, $65,000 in cash payments and $100,000 equivalent in Shares on the second and third anniversaries for a total of $230,000 in cash payments and $450,000 equivalent in Shares;
- $100,000 in expenditures in the first 16 months and $100,000 in expenditures in the subsequent six months;
- $100,000 equivalent in Shares on filing a NI 43-101 Technical Report with mineral resources and a further $250,000 equivalent in Shares if the mineral resources (all categories) exceed 300,000 ounces of gold
- $150,000 equivalent in Shares on commencement of commercial production and a further $350,000 equivalent in Shares after production of 100,000 ounces of gold; and
- 2% net smelter return ("NSR") royalty, of which 1% may be bought back for $2,000,000.

On April 12, 2022, the Corporation provided a notice of termination in respect of the option agreement on the Norbeau property.

<u>Beaurox Property</u>

- $35,000 in cash payments and $25,000 equivalent in Shares following receipt of TSX Venture Exchange approval (paid), $50,000 in cash payments and $50,000 equivalent in Shares on the six-month anniversary (paid), and on the first, second and third anniversaries for a total of $235,000 in cash payments and $225,000 equivalent in Shares;
- $300,000 in expenditures in the first 18 months and $300,000 in expenditures in the subsequent six months;
- $75,000 in cash payments on commencement of drilling (paid) and $100,000 in cash payments after completion of 5,000 meters;
- 5,000 meters of drilling or cumulative equivalent expenditures prior to the third anniversary;
- $100,000 equivalent in Shares on filing a NI 43-101 Technical Report with mineral resources;
- $150,000 equivalent in Shares on commencement of commercial production; and
- 2% NSR royalty, of which 0.75% may be bought back for $3,000,000, and approximately $60,000 in advance royalty payments commencing in year three.

On March 6, 2022, the Corporation provided a notice of termination in respect of the option agreement on the Beaurox property.

Tax credits receivable

The Corporation has recorded $2,350,000 in expected tax credits against exploration activity for the year ended December, 31, 2021. During the nine month period ended September 30, 2022, the Corporation received a refund of $562,125 in respect of the 2020 exploration activity.

Liquidity and Capital Resources

The Corporation's cash and cash equivalents balance was $1,038,177 at September 30, 2022 compared to $13,227,922 at December 31, 2021. Current assets at September 30, 2022 were $5,227,480 compared to $18,346,320 at December 31, 2021 and total assets at September 30, 2022 were $12,477,060 compared to $24,334,999 at December 31, 2021. The Corporation continues to use our cash resources to further our exploration projects.

Promissory notes

In relation to the acquisition of CBay, AmAuCu issued promissory notes to Ocean Partners, a related party, in the aggregate amount of $7,500,000, plus accrued interest. These promissory notes are considered a financial liability under IFRS 9 and are initially measured at fair value with subsequent measurement at amortised cost. The obligations of the Corporation under the promissory notes are guaranteed by CBay with such guarantee secured against the property and assets of CBay. Each of the promissory notes bear interest at a rate of 6% per annum, with $1,000,000 maturing on the commencement of commercial production, $2,000,000 maturing on the first anniversary of the commencement of commercial production, $2,000,000 maturing on the second anniversary of the commencement of commercial production, and $2,500,000 maturing on the third anniversary of the commencement of commercial production. The settlement of the obligation, both principal and interest, is contingent upon the timing of commencement of commercial production. Given the lack of certainty at this time as to whether the Corporation will reach the operational and economic milestones needed to achieve commercial production, and the estimated timeline to do so, the notes currently have nominal or no fair value. The accrued interest as at September 30, 2022 would be valued at $1,500,000 (December 31, 2021 - $1,162,500). reassesses the amount, timing and probability of future cash flows at each reporting period to determine any required adjustments to the amortised cost balance of $Nil. As at September 30, 2022, no adjustment has been made.

Operating Activities

For the nine months ended September 30, 2022, the Corporation used $10,858,643 in cash related to operating activities. The most significant non-cash charges to earnings include share-based payments of $511,310, and non-cash exploration expenses of $500,000. These were off-set by non-cash credit to income of $2,298,597,related to flow-through share premium. For the nine months ended September 30, 2022 the majority of the cash used in operating activities can be attributed to the funding of day to day operations and furthering our understanding of our projects.

Investment Activities

For the nine months ended September 30, 2022, the Corporation used $1,331,102 in cash related to investment activities, as compared to $12,405 used in the previous year .

Financing Activities

For the nine months ended September 30, 2022, the Corporation generated $Nil from financing activities, whereas in the same period of the previous year, the Corporation generated cash of $25,554,852.

Outstanding share data

(a) On January 4, 2021 the Corporation completed an option payment on the Joe Mann property pursuant to which the Corporation made a cash payment of $250,000, and issued 500,000 common shares at a price of $1.00 per share.

(b) On January 22, 2021, the Corporation announced the closing of the final tranche of its previously announced non-brokered private placement (the "Offering"), pursuant to which the Corporation sold an aggregate of 2,999,622 common shares in the capital of the Corporation ("Offered Shares") at a price of $0.68 per Offered Share for aggregate gross proceeds of $2,039,742. Together with the first tranche of the Offering, the Corporation sold an aggregate of 8,800,000 common shares in the capital of the Corporation under the Offering for aggregate gross proceeds of $5,984,000.

Paradigm Capital Inc., Cormark Securities Inc. and Canaccord Genuity Corp. acted as finders (each, a "Finder") in connection with the final tranche of the Offering. In consideration for acting as a finder in connection with the final tranche of the Offering, the Corporation paid an aggregate of $31,048 in cash finder's fees to the Finders, representing 6% of the gross proceeds of the Offered Shares that were sold to subscribers introduced by such parties, and issued an aggregate of 45,660 non-transferable warrants (the "Finder's Warrants") to purchase common shares in the capital of the Corporation (the "Finder's Warrant Shares") to the Finders, representing 6% of the Offered Shares that were sold to subscribers introduced by such parties, with each Finder's Warrant being exercisable for one Finder's Warrant Share at a price of C$0.68 per Finder's Warrant Share until January 22, 2023. In addition to the finder's fees, the Corporation also paid administrative fees in the amount of $49,499 in respect of three subscriptions under the Offering.

(c) On February 18, 2021, the Corporation closed a "best efforts" private placement (the "Offering"), pursuant to which the Corporation sold an aggregate of 12,221,000 common shares of the Corporation that will qualify as "flow-through shares" within the meaning of subsection 66(15) of the *Income Tax Act* (Canada) (the "Flow-Through Shares") at a price of $0.90 per Flow-Through Share for aggregate gross proceeds of $10,998,900, including the full exercise of the agents' option.

Cormark Securities Inc. and Paradigm Capital Inc. acted as agents (the "Agents") in connection with the Offering pursuant to the terms of an agency agreement dated February 18, 2021. In consideration for their services in connection with the Offering, the Corporation paid the Agents a cash commission equal to $659,934 representing 6% of the aggregate gross proceeds from the sale of Flow-Through Shares.

The Corporation will use an amount equal to the gross proceeds received by the Corporation from the sale of the Flow-Through Shares, pursuant to the provisions in the *Income Tax Act* (Canada), to incur eligible "Canadian exploration expenses" that qualify as "flow-through mining expenditures" as both terms are defined in the *Income Tax Act* (Canada) (the "Qualifying Expenditures") on or before December 31, 2022, and will renounce all of the Qualifying Expenditures in favour of the purchasers of the Flow-Through Shares effective December 31, 2021. The Corporation will shortly announce its drilling plans for the next two quarters based on the funds available from the recent financing's.

The Offering was made by way of private placement in Canada pursuant to applicable exemptions from the prospectus requirements under applicable Canadian securities laws. The securities issued under the Offering are subject to a hold period under applicable Canadian securities laws which will expire on June 19, 2021.

(d) On March 10, the Corporation issued 100,000 common shares at a price of $0.50 in relation to the exercise of stock options by an employee of the Corporation.

(e) On March 13, 2021, the Corporation issued 184,210 common shares at a price of $0.95 in relation to the Norbeau property option agreement.

(f) On March 13, 2021, the Corporation issued 26,315 common shares at a price of $0.95 in relation to the Norbeau East (Beaurox) property option agreement.

(g) On June 1, 2021, the Corporation closed a bought-deal private placement pursuant to which Cormark Securities Inc. and Paradigm Capital Inc., as co-lead underwriters, (collectively, the “Underwriters“), agreed to purchase, on a “bought deal” private placement basis: (i) 9,636,050 common shares in the capital of the Corporation (the “Offered Common Shares“) at a price of $1.00 per Offered Common Share (the “Common Share Offering Price“) for gross proceeds of $9,636,050 and (ii) 2,907,000 common shares in the capital of the Corporation that qualify as “flow-through shares” (within the meaning of subsection 66(15) of the Income Tax Act (Canada) and section 359.1 of the Taxation Act (Québec)) (the “Flow-Through Shares“) at a price of $1.72 per Flow-Through Share for gross proceeds of $5,000,040.

(h) On June 2, 2021, the Corporation issued 10,752 common shares at a price of $0.68 in relation to the exercise of broker warrants.

(i) On September 10, 2021, the Corporation issued 56,180 common shares at a price of $0.90 in relation to the Norbeau East (Beaurox) property option agreement.

(j) On September 16, 2021 the Corporation issued 33,333 common shares at a price of $0.50, and 10,000 common shares at an exercise price of $0.66, in relation to the exercise of stock options by an employee of the Corporation.

(k) On January 27, 2022 the Corporation completed an option payment on the Joe Mann property pursuant to which the Corporation made a cash payment of $1,000,000, and issued 632,911 common shares at a price of $0.79 per share.

(l) On October 21, 2022 the Corporation closed a "best efforts" private placement (the "Offering"), pursuant to which the Corporation sold an aggregate of (i) 7,666,820 common shares in the capital of the Corporation (the "Offered Common Shares") at a price of $0.30 per Offered Common Share for gross proceeds of $2,300,046 and (ii) 9,583,525 common shares in the capital of the Corporation that will qualify as "flow-through shares" (within the meaning of subsection 66(15) of the *Income Tax Act* (Canada) and section 359.1 of the *Taxation Act* (Québec)) (the "Flow-Through Shares") at a price of $0.36 per Flow-Through Share for gross proceeds of $3,450,069, for aggregate gross proceeds to the Corporation of $5,750,115, including the full exercise of the agents' option.

Cormark Securities Inc., Desjardins Securities Inc. and Paradigm Capital Inc. acted as agents (collectively, the "Agents") in connection with the Offering pursuant to the terms of an agency agreement dated October 21, 2022. In consideration for their services in connection with the Offering, the Corporation paid the Agents a cash commission equal to $329,555, being 6% of the aggregate gross proceeds from the sale of Offered Common Shares and Flow-Through Shares, and a reduced cash commission equal to 3% of the aggregate gross proceeds from the sale of Offered Common Shares to certain subscribers on the President's List. In addition, the Corporation also paid fees in the aggregate amount of approximately $35,753 (plus applicable taxes) in respect of two subscriptions under the Offering.

iii. Warrants

The following table reflects the continuity of warrants as at September 30, 2022:

Issued and outstanding:		# of share warrants	Weighted average exercise price ($)	Fair value	Expiry date
Balance, January 1, 2020		**2,344,677**	**-**	**212,685**

Expiry of warrants		(2,316,900)	1.68	-	
Broker warrants issued pursuant to private placement (final tranche)	(c)	45,660	0.68	16,529	1/22/2023
Balance, December 31, 2021		543,738		475,371	
Expiry of warrants		(179,581)	0.68		
Balance, September 30, 2022		**364,157**	**-**	**475,371**	

(a) As additional consideration for services in connection with the closing of the Flow-Through Share Offering on August 25, 2020, the Corporation issued the Agents non-transferable broker warrants of the Corporation (“Broker Warrants“) equal to 6% of the aggregate number of Flow-Through Shares issued. Each Broker Warrant is exercisable to acquire one common share in the capital of the Corporation at an exercise price of $1.12 per share expiring August 25, 2022.

(b) As additional consideration for services in connection with the closing of the initial tranche of the Private Placement Offering on December 23, 2020, the Corporation issued the Agents non-transferable broker warrants of the Corporation (“Broker Warrants“) equal to 6% of the aggregate number of Common Shares issued. Each Broker Warrant is exercisable to acquire one common share in the capital of the Corporation at an exercise price of $0.68 per share expiring December 23, 2022.

(c) As additional consideration for services in connection with the closing of the final tranche of the Private Placement Offering on January 22, 2021, the Corporation issued the Agents non-transferable broker warrants of the Corporation (“Broker Warrants“) equal to 6% of the aggregate number of Common Shares issued. Each Broker Warrant is exercisable to acquire one common share in the capital of the Corporation at an exercise price of $0.68 per share expiring January 22. 2023.

For purposes of the broker warrants issued, the fair value of each option was estimated on the date of grant using the Black-Scholes option pricing model, with the following assumptions:

	2022	2021
Risk-free interest rate	**n/a**	**0.1757%**
Annualized volatility*	**n/a**	**87.72%**
Expected dividend	**n/a**	**NIL**
Expected option life	**n/a**	**2 years**

* Volatility based on similar publicly traded companies

iv. Options

The Corporation has a omnibus share incentive plan (the "Plan") which is restricted to directors, officers, key employees and consultants of the Corporation. The number of common shares subject to options granted under the Plan (and under all other management options and employee stock purchase plans) is limited to 10% in the aggregate and 5% with respect to any one optionee of the number of issued and outstanding common shares of the Corporation at the date of the grant of the option. Options issued under the Plan may be exercised during a period determined by the Board of Directors which cannot exceed ten years.

The continuity of stock options issued and outstanding are as follow:

Issued and outstanding:	Options outstanding (#)	Weighted average exercise price ($)
Balance, January 1, 2021	2,235,500	0.60
Granted	1,364,500	1.10
Exercised	(143,333)	0.55
Forfeited	(36,667)	0.57
Outstanding at December 31, 2021	3,420,000	0.81
Granted	2,042,500	0.61
Forfeited	(590,000)	0.55
Outstanding at September 30, 2022	**4,872,500**	**0.63**

During the three and nine months ended September 30, 2022, there were no options exercised (2021 - $nil).

At September 30, 2022, the following options were outstanding and outstanding and exercisable:

	Outstanding		Outstanding and Exercisable	
Weighted average exercise price	**Options #**	**Weighted average remaining life (years)**	**Options #**	**Weighted average remaining life (years)**
$0.50 - $0.70	3,410,500	4.50	1,297,000	2.85
$0.79 - $0.96	187,500	4.00	45,000	3.75
$1.04 - $1.10	1,274,500	4.16	372,333	3.86
	4,872,500	**4.02**	**1,714,333**	**3.48**

The Corporation applies the fair value method of accounting for all stock based compensation awards and accordingly, $328,113 was recorded as compensation for the three months ended September 30, 2022 (2021 - $172,677), and $511,310 was recorded as compensation for the nine months ended September 30, 2022 (2021 - 356,563)

- The Corporation currently estimates the forfeiture rate to be nil.

For purposes of the options granted, the fair value of each option was estimated on the date of grant using the Black-Scholes option pricing model, with the following assumptions:

	September 30, 2022	December 31, 2021
Risk-free interest rate	**0.13% - 0.34%**	0.8218% - 0.9154%
Annualized volatility**	**82.32% - 83.69%**	94.38% - 65.77%
Expected dividend	**nil**	nil
Expected option life	**5 years**	5 years
Expected forfeiture rate	**nil**	nil

** Volatility based on similar publicly traded companies.

v. Restricted Share Unit Plan and Deferred Share Unit Plan

The Corporation's omnibus share incentive plan allows for the Board of Directors to grant its employees non-transferable share units ("Restricted Share Unit" or "RSU") based on the value of the Corporation's share price at the date of grant. The awards have a graded vesting schedule over a three-year period. Under the Plan, the awards can be equity or cash settled immediately upon vesting. The Plan also allows for the Corporation to grant members of its Board of Directors non-transferable share units ("Deferred Share Unit" or "DSU") based on the value of the Corporation's share price at the date of grant. The awards have a graded vesting schedule over a three-year period. DSUs must be retained until the Director leaves the Board, at which time the awards will be equity or cash settled.

During the period ended September 30, 2022, there were 150,000 DSU's granted, vesting equally over a three year period beginning May 12, 2023. The Corporation estimated a forfeiture rate of nil% for DSU's issued during the period.

vi. Share-based payments

	Three months ended September 30, 2022	2021	Nine months ended September 30, 2022	2021
Stock option valuation	**$ 328,113**	$ 193,861	**$ 506,643**	$ 550,425
DSU valuation			**4,667**	
	$ 328,113	$ 193,861	**$ 511,310**	$ 550,425

Related Party Transactions

The Corporation's related parties include management personnel and entities over which they have control or significant influence as described below.

	Nature of transactions
Halstone Corporate Services	Accounting, IT and management services
EDM Mining and Metals Advisory	Consulting and management services
Ocean Partners Investments Limited	Credit facility

Unless otherwise stated, none of the transactions incorporate special terms and conditions and no guarantees were given or received. Outstanding balances are usually settled in cash, however in certain circumstances they Corporation may issue some form of equity.

The following are the related party transactions, recorded at the exchange amount as agreed to by the parties for the three and nine months ended September 30, 2022 and 2021, respectively:

(a) Included in general and administrative expenses are amounts totaling $36,622 and $113,959 (2021 - $31,927 and $102,766) for accounting, IT and management services provided by Halstone Corporate Services, a company related to the Corporation through Gavin Nelson, CFO of Doré, and an officer of Halstone.

(b) Included in consulting expenses are amounts totaling $50,001 and $250,003 (2021 - $50,001 and $266,670) for management services paid to EDM Mining & Metals Advisory, a company related to the Corporation through Ernest Mast, President and CEO of the Corporation, as well as EDM.

(c) As part of the CBay asset acquisition, the Corporation issued promissory notes to Ocean Partners Investment Limited, a company related to the Corporation through Brent Omland, Director of AmAuCu and Doré, and an officer of Ocean Partners Ltd. At June 30, 2022 the fair value of the promissory notes has been determined to be $Nil (2021 - $Nil).

Key management personnel remuneration includes the following amounts:

	2022 **$**	2021 $
Salary, wages and consulting fees	**392,879**	392,899
Share-based payments	**200,102**	214,096
	592,981	606,995

Flow-through renunciation

On February 18, 2021, the Corporation completed a flow-through financing to raise $10,998,900. The Corporation intends to renounce 100% of the flow-through raised in 2021 to investors as at December 31, 2021. The Corporation has until February 1, 2022 to incur expenditures before monthly interest charges began to accrue on unspent funds. Interest charges incurred by the Corporation as a result of this income tax legislation are charged to income in the period incurred. Of the $10,998,900 in flow-through financing raised in the February 18, 2021 financing, the Corporation has incurred $10,998,900 in exploration expenses, and thus must incur expenses of $Nil by December 31, 2022, to fulfil its obligation in relation to these renounced expenditures.

On June 1, 2021, the Corporation completed a flow-through financing to raise $5,000,040. The Corporation intends to renounce 100% of the flow-through raised in 2021 to investors as at December 31, 2021. The Corporation has until

February 1, 2022 to incur expenditures before monthly interest charges began to accrue on unspent funds. Interest charges incurred by the Corporation as a result of this income tax legislation are charged to income in the period incurred. Of the $5,000,040 in flow-through financing raised in the June 1, 2021 financing, the Corporation has incurred $3,921,907 in exploration expenses, and thus must incur expenses of $1,078,133 by December 31, 2022, to fulfil its obligation in relation to these renounced expenditures.

Subsequent event

Joe Mann agreement amendments

On November 1, 2022 the Company entered into an amending agreement (the "Amending Agreement") with Ressource Jessie Inc. (the "Optionor") in respect of the Joe Mann Property. Pursuant to the terms of the Amending Agreement, the Company has agreed to accelerate the final scheduled cash and share payments under the Option Agreement. The Company has made the final scheduled cash payment of $1,500,000 to Ressources Jessie (thus fulfilling the scheduled cash payment obligations), and will issue 3,333,333 common shares in the capital of the Company ("Common Shares") to Legault Metals Inc. ("Legault") at a deemed price of $0.30 per Common Share for an aggregate value of $1,000,000 upon acceptance of the TSX Venture Exchange (thus fulfilling all scheduled share payment obligations). The deadline for the Company to incur the remaining exploration expenditures on the Property has also been extended to February 28, 2023.

Following the fulfillment of the scheduled cash and share payment obligations, Ressources Jessie will commence the transfer of the Property to the Company. Upon exercise of the option, the Company is required to grant to Ressources Jessie a 2% net smelter return ("NSR") royalty on the mine production from the Property. The Company will entitled to buy back 1% NSR in consideration for a payment to Ressources Jessie of $2,000,000 and to buy back an additional 0.5% NSR in consideration for a payment to Ressources Jessie of $4,000,000.

Pursuant to the original terms of the Option Agreement, upon the commencement of commercial production at the Property, Doré Copper will make an additional $1,000,000 cash payment to Ressources Jessie and issue $1,500,000 in Common Shares to Legault.

Critical Accounting Estimates and Judgments

In the application of the Corporation’s accounting policies, which are described in Note 2 of the Corporation's December 31, 2021 audited financial statements, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The consolidated financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and the revision affects both current and future periods. Significant judgements, estimates and assumptions include:

- the inputs used in accounting for share purchase option expense in the consolidated statement of loss and comprehensive loss;
- the inputs used in accounting for value of warrants in the consolidated statement of financial position;
- valuation of the refundable mining duties credit and the refundable tax credit for resources. The calculation of the Corporation’s mining duties credit and tax credit for resources necessarily involves a degree of estimation and judgment in respect of certain items whose tax treatment cannot be finally determined until a notice of assessment and payment has been received from the relevant taxation authority. Uncertainties exist with respect to the interpretation of tax regulations, including the mining duties credit and the tax credit for resources for which certain expenditures could be disallowed by the taxation authorities in the calculation of credits, and the amount and timing of their collection. Differences arising between the actual results following the final resolution of some of these items and the assumptions made, or future changes to such assumptions, could necessitate adjustments to the mining duties credit and tax credit for resources and the exploration and evaluation expenses in future periods;
- the provision for income taxes which is included in the consolidated statements of loss and comprehensive

loss and composition of deferred income tax assets and liabilities included in the consolidated statement of financial position which have not yet been confirmed by the taxation authorities, and

- the estimated useful lives of equipment and leaseholds which are included in the consolidated statement of financial position and the related depreciation included in the consolidated statement of loss and comprehensive loss.

Financial Instruments

Financial instruments consist of cash and cash equivalents, amounts receivable, and accounts payable and accrued liabilities. The fair value of these financial instruments approximates their carrying value due to the short term to maturity, unless otherwise noted.

Risk Factors

An investment in the Corporation involves a number of risks. You should carefully consider the following risks and uncertainties in addition to other information in this report in evaluating the Corporation and its business before making any investment decision in regards to the common shares of the Corporation. The Corporations' business, operating and financial condition could be harmed due to any of the following risks. The risks described below are not the only ones facing the Corporation. Additional risks not presently known to us may also impair business operations.

Exploration and Mining Risks

The Corporation is engaged in mineral exploration and development activities. Mineral exploration and development involves a high degree of risk and few properties which are explored are ultimately developed into producing mines. The long-term profitability of our operations will be in part directly related to the cost and success of our exploration programs, which may be affected by a number of factors beyond our control.

Mineral exploration involves many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. Operations in which the Corporation has a direct or indirect interest will be subject to all the hazards and risks normally incidental to exploration, development and production of mineral resources, any of which could result in work stoppages, damage to property, and possible environmental damage.

Hazards such as unusual or unexpected formations and other conditions such as formation pressures, fire, power outages, labour disruptions, flooding, explorations, cave-ins, landslides and the inability to obtain suitable machinery, equipment or labour are involved in mineral exploration, development and operation. We may become subject to liability for pollution, cave-ins or hazards against which we cannot insure or against which we may elect not to insure. The payment of such liabilities may have a material, adverse effect on our financial position.

The Corporation relies upon consultants and others for exploration and development expertise. Substantial expenditures are required to establish ore reserves through drilling, to develop metallurgical processes to extract the metal from the ore and, in the case of new properties, to develop the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that funds required for development can be obtained on a timely basis. The economics of developing mineral properties is affected by many factors including the cost of operations, variations in the grade of ore mined, fluctuations in metal markets, allowable production, importing and exporting of minerals and environmental protection.

Financing Risks

The Corporation is limited in financial resources, and as a mineral exploration company has no source of operating cash flow. The Corporation has no assurance that additional funding will be available to us for further exploration and development of our projects or to fulfil our obligations under any applicable agreements. There can be no assurance that we will be able to obtain adequate financing in the future, or that the terms of such financing will be favourable. Failure to obtain additional financing could result in delay or indefinite postponement of further exploration and development of our projects with the possible loss of such properties.

Regulatory Requirements

Even if our mineral properties are proven to host economic reserves of mineral resources, factors such as governmental expropriation or regulation may prevent or restrict mining of any such deposits or repatriation of profits. The Corporation may acquire other properties in other jurisdictions or countries. Any changes in regulations or shifts in political conditions are beyond the control of the Corporation and may adversely affect our business. Operations may be affected in varying degrees by government regulations with respect to restrictions on production, price controls, export controls, income taxes, and expropriation of property, environmental legislation and mine safety.

Uninsurable Risks

In the course of exploration, development and production of mineral properties, certain risks, and in particular, unexpected or unusual geological operating conditions including rock bursts, cave-ins, fires, flooding and earthquakes may occur. It is not always possible to fully insure against such risks and the Corporation may decide not to take out insurance against such risks as a result of high premiums or other reasons. Should such liabilities arise, they could reduce or eliminate any future profitability and result in increasing costs and a decline in the value of the securities of the Corporation.

No Assurance of Titles

It is possible that any of our properties may be subject to prior unregistered agreements or transfers or native land claims and title may be affected by undetected defects.

Permits and Licenses

The operations of the Corporation may require licenses and permits from various governmental authorities. There can be no assurance that such licenses and permits as may be required to carry out exploration, development and mining operations at our projects will be granted.

Competition

The mineral industry is intensely competitive in all its phases. We compete with many companies possessing greater financial resources and technical facilities than the Corporation for the acquisition of mineral concessions, claims, leases and other mineral interests as well as for the recruitment and retention of qualified employees.

In addition, there is no assurance that a ready market will exist for the sale of commercial quantities of ore. Factors beyond the control of the Corporation may affect the marketability of any substances discovered. These factors include market fluctuations, the proximity and capacity of natural resource markets and processing equipment, government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Corporation not receiving an adequate return on invested capital or losing our investment capital.

Environmental Regulations

Our operations may be subject to environmental regulations promulgated by government agencies from time to time. Environmental legislation provides for restrictions and prohibitions on spills, releases or emissions of various substances produced in association with certain mining industry operations, such as seepage from tailings disposal areas, which would result in environmental pollution. A breach of such legislation may result in imposition of fines and penalties. In addition, certain types of operations require the submission and approval of environmental impact assessments. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. The cost of compliance with changes in governmental regulations has a potential to reduce the profitability of operations. There is no assurance that future changes in environmental regulation, if any, will not adversely affect our operations.

Stage of Development

The Corporation is in the business of exploring for, with the ultimate goal of producing, mineral resources from our mineral exploration properties. None of our properties have commenced commercial production and we have no history of earnings or cash flow from our operations. As a result of the foregoing, there can be no assurance that we will be able to develop any of our properties profitably or that our activities will generate positive cash flow. We are unlikely to enjoy earnings or pay dividends in the immediate or foreseeable future. A prospective investor in the Corporation must be prepared to rely solely upon the ability, expertise, judgment, discretion, integrity and good faith of our management in all aspects of the development and implementation of our business activities.

Markets for Securities

There can be no assurance that an active trading market in our securities will be established and sustained. The market price for our securities could be subject to wide fluctuations. Factors such as commodity prices, government regulation, interest rates, share price movements of our peer companies and competitors, as well as overall market movements, may have a significant impact on the market price of the securities of the Corporation. The stock market has from time to time experienced extreme price and volume fluctuations, particularly in the mining sector, which have often been unrelated to the operating performance of particular companies.

Reliance on Key Individuals

Our success depends to a certain degree upon certain key members of the management. It is expected that these individuals will be a significant factor in our growth and success. The loss of the service of members of the management and certain key employees could have a material adverse effect on the Corporation.

Geopolitical Risks

The Corporation may be affected in varying degrees by government regulations with respect to, but not limited to, restrictions on future exploitation and production, price controls, export controls, currency availability, income taxes, delays in obtaining or the inability to obtain necessary permits, opposition to mining from environmental and other non-governmental organizations, expropriation of property, ownership of assets, environmental legislation, labour relations, limitations on mineral exports, increased financing costs, and site safety. In addition, legislative enactments may be delayed or announced without being enacted and future political action that may adversely affect the Corporation cannot be predicted. Any changes in regulations or shifts in political attitudes that may result, among other things, in significant changes to mining laws or any other national legal body of regulations or policies are beyond the control of the Corporation and may adversely affect its business. The possibility that future governments may adopt substantially different policies, which might extend to the expropriation of assets, cannot be ruled out.

Influence of Third-Party Stakeholders

Some of the lands in which the Corporation holds an interest, or the exploration equipment and roads or other means of access which the Corporation intends to utilize in carrying out its work programs or general business activities, may be subject to interests or claims by third party individuals, groups or companies. In the event that such third parties assert any claims or do not consent to the Corporation carrying on activities on lands subject to their interests or claims, the Corporation's work programs may be delayed or prevented, even if such claims are not meritorious. Such claims or delays may result in significant financial loss and loss of opportunity for the Corporation.

The Corporation may need to enter into negotiations with landowners and other groups in local communities in order to conduct further exploration and development work on its properties. There is no assurance that future discussions and negotiations will result in agreements with landowners and other local community groups or if such agreements will be on terms acceptable to the Corporation so that the Corporation may continue to conduct exploration and development activities on these properties.

Industry and Economic Factors Affecting the Corporation

The Corporation is a junior resource issuer focused primarily on the evaluation, exploration and development of mineral properties and potential acquisition of mineral properties in the future. The Corporation's future performance is largely tied to the financial markets related to junior resource companies, which is often cyclical. The Corporation will continuously monitor several economic factors including the uncertainty regarding the price of copper, and gold and other metals and the availability of equity financing for the purposes of mineral exploration and development. The Corporation's future performance is largely tied to its ability to raise additional financing needed to fund its ongoing exploration and operating activities and to pursue the exploration and the development of its mineral property interests and the overall financial markets. Financial markets in the mining sector are likely to continue to be volatile reflecting ongoing concerns about the global economy. Companies worldwide have been affected negatively by these trends. As a result, the Corporation may have difficulties raising equity financing needed for the purposes of mineral exploration and development, particularly without excessively diluting the interests of its current shareholders.

Health Epidemics and Outbreaks of Communicable Diseases

Doré's business could be adversely impacted by the effects of the novel coronavirus or other health epidemics and/or outbreaks of communicable diseases, which could significantly disrupt the Corporation's exploration and development activities and may have a material adverse effect on Corporation's business and financial condition. The World Health Organization declared a global pandemic on March 2020 related to COVID-19. Global travel and workplace restrictions have been implemented as a result. The extent to which COVID-19 impacts the Corporation's business, including the Corporation's operations and the market for the Corporation's securities, will depend on future developments, which are highly uncertain and cannot be predicted at this time, including the duration, severity and scope of the coronavirus outbreak and the actions taken to contain or treat the outbreak. In particular, the continued or perceived spread of the coronavirus globally could materially and adversely impact the Corporation's business including, without limitation, employee health, workforce productivity, increased insurance premiums, limitations on travel, the availability of industry experts and personnel, stoppage or suspension of its operations in Canada including restrictions to its drilling, development and exploration programs and/or the timing to process drill and other metallurgical testing and other factors that will depend on future developments beyond the Corporation's control, which may have a material adverse effect on the Corporation's business, financial condition and results of operations. Moreover, the actual and threatened spread of COVID-19 globally could also have a material adverse effect on the regional economies in which the Corporation operates, could continue to negatively impact stock markets, including the trading price of the Doré Common Shares, could adversely impact the Corporation's ability to raise capital, could cause continued interest rate volatility and movements that could make obtaining financing more challenging or more expensive, could adversely affect global economies and financial markets resulting in an economic downturn that could have an adverse effect on the demand for base and precious metals and Doré 's future prospects and could result in any operations affected by COVID-19 becoming subject to quarantine. Any of these developments, and others, could have a material adverse effect on the Corporation's business and results of operations. There can also be no assurance that the Doré 's personnel will not be impacted by these pandemic diseases and ultimately see all or a portion of its operations suspended, workforce productivity reduced or incur increased medical costs and/or insurance premiums as a result of these health risks.

Financial instruments and related risks

The Corporation's operations include the acquisition and exploration of mineral properties in Canada. The Corporation examines the various financial risks to which it is exposed and assesses the impact and likelihood of occurrence. These risks may include credit risk, liquidity risk, currency risk, interest rate risk and other risks. Where material, these risks are reviewed and monitored by the Board of Directors.

[a] Credit risk
Counterparty credit risk is the risk that the financial benefits of contracts with a specific counterparty will be lost if a counterparty defaults on its obligations under the contract. This includes any cash amounts owed to the Corporation by those counterparties, less any amounts owed to the counterparty by the Corporation where a legal right of off-set exists and also includes the fair values of contracts with individual counterparties which are recorded in the financial statements.

i) Trade credit risk
The Corporation is in the exploration stage and has not yet commenced commercial production or sales. Therefore, the Corporation is not exposed to significant credit risk and overall the Corporation's credit risk has not changed significantly from the prior year.

ii) Cash and cash equivalents
In order to manage credit and liquidity risk the Corporation invests only in highly rated investment grade instruments that have maturities of three months or less and are cashable at any time. Limits are also established based on the type of investment, the counterparty and the credit rate.

iii) Derivative financial instruments
As at September 30, 2022, the Corporation has no derivative financial instruments. It may in the future enter into derivative financial instruments in order to manage credit risk, it will only enter into derivative financial instruments with highly rated investment grade counterparties.

[b] Liquidity risk
Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they fall due. The Corporation manages liquidity risk through the management of its capital structure.

Accounts payable and accrued liabilities are due within the current operating period.

[c] Interest rate risk
Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The risk that the Corporation will realize a significant loss as a result of a decline in the fair market value is limited as the Corporation holds all of its funds in cash and guaranteed investment certificates.

The Corporation does not invest in derivatives to mitigate these risks.

IFRS 13 establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 - inputs for the asset or liability that are not based on observable market data (unobservable inputs).

	Level 1 **$**	Level 2 **$**	Level 3 **$**	**Total** **$**
Assets				
Investments	-	840,419	-	**840,419**

Management of Capital Risk

The Corporation manages its common shares and stock options as capital, the balance of which is $53,626,121 at September 30, 2022 (December 31, 2021 - $52,614,811). The Corporation's objectives when managing capital are to safeguard the Corporation's ability to continue as a going-concern in order to pursue the exploration of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Corporation manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Corporation may attempt to issue new shares and, acquire or dispose of assets or acquire new debt.

Off-Balance Sheet Arrangements

There are no off-balance sheet arrangements.

Cautionary Statement on Forward-Looking Statements

Certain information set forth in this MD&A, including management's assessment of the Corporation's future plans and operations, contains forward-looking statements. By their nature, forward-looking statements are subject to numerous risks and uncertainties, some of which are beyond the Corporation's control, including the impact of general economic conditions, industry conditions, volatility of commodity prices, currency fluctuations, imprecision of reserve estimates, environmental risks, competition from other industry participants, the lack of availability of qualified personnel or management, stock market volatility and ability to access sufficient capital from internal and external sources. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be inaccurate and, as such, reliance should not be placed on forward-looking statements. Doré Copper Mining Corp.'s actual results, performance or achievement could differ materially from those expressed in, or implied by, these forward-looking statements and, accordingly, no assurance can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what benefits, if any, that Doré Copper Mining Corp. will derive there from. Doré Copper Mining Corp. disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise except as required by applicable law.

Qualified Person

All scientific and technical data contained in this MD&A has been reviewed and approved by Mr. Ernest Mast, P. Eng, President, CEO and Director and and Sylvain Lépine, M.Sc, P.Geo., Vice President Exploration, of Doré Copper Mining Corp., both Qualified Persona as defined by National Instrument 43-101.

Additional Information

Additional information relating to the Corporation can be found on the Doré's website, www.dorecopper.com, and on SEDAR at www.sedar.com.
